Fishing periods and specific areas to be opened in the Danger Bay and Village Islands/Uganik Bay sections will be determined inseason.

Emergency order fisheries in the Danger Bay and Village Islands/Uganik Bay sections will allow orderly fisheries on high quality herring. Fisheries will only open after test fishing detects fishable quantities of good quality herring (size and roe content). Fisheries may be short in duration and limited in area. If enough herring are observed ADF&G will be seeking volunteer fishing vessels in Danger Bay to make test sets beginning on April 15. Cooperation from fishing vessels and industry technicians are needed to test herring quality in these sections.

The remainder of the Kodiak Area will stay closed to commercial herring fishing for the entire sac roe season.

Beginning May 1, ADF&G may open any area with remaining herring GHs to any gear group if the fishery is not likely to result in overharvest of the resource.

GHs and maps of open sections and gear assignments are available at the Kodiak office and in the herring sac roe fishery harvest strategy for the 2018 season. Fishermen are urged to check with their market and test their catch prior to landing herring. Determining if size or roe quality meets processor standards is the responsibility of fishermen and industry. It is anticipated that many small and green fish will be present on the grounds during the initial open fishing periods. Recent fishery information may be obtained by calling the Department's 24-hour record-a-phone at 486-4559.
